Introducing AQURIT® Microfilm

Simplify Check Storage

AQURIT® Microfilm Replacement, from **Aquracy Corp.**, makes it easier and more affordable than ever for banks and financial institutions to migrate to check imaging, storage and retrieval. AQURIT® Microfilm Replacement is a highly scaleable and fully upgradeable desktop imaging system, providing the performance, flexibility, and reliability necessary to meet your needs today – and beyond.

The software helps banks more easily manage, access and integrate check images and data into their operations – eliminating the need for costly and ineffective microfilm.

Unlock Cost Savings And Improved Productivity

Easy to use and cost-effective, AQURIT® Microfilm Replacement saves time, increases productivity, improves customer service, speeds check research, reduces storage space, and better positions your organization for emerging check processing trends. What's more, you can rest easy knowing that check imaging is proven to provide reliable, long-lasting storage of your vital customer data, and offers easy back-up for security and disaster recovery purposes. And you get all of this from a solution that takes up less than two square feet of your desktop! The best part: while the robust functionality and industrial strength reliability of AQURIT® Microfilm Replacement meets the requirements of the most demanding operations, the software is specifically priced and designed for banks and financial institutions.

Boost Efficiency Through Feature-Rich Software

Built on the state-of-the-art AQURIT® infrastructure that is used by many remittance organizations nationwide, AQURIT® Microfilm Replacement is packed with many of the same features that have set our solutions apart. The software supports industry leading check scanners from Canon and SEAC-Banche. Here's what else the software features:

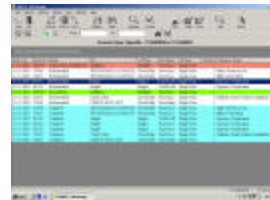

- | | |
|-----------------------------------|-------------------------------------|
| Front and back image capture | Grayscale or bi-tonal image formats |
| MICR capture and parsing | Manual correction of MICR rejects |
| Multiple statistical reports | Easy creation of CD-ROMs |
| Browser retrieval capabilities | Ability to e-mail images and data |
| Numerous image print formats | Customizable image print labels |
| User-defined ink jet endorsements | Real-time workflow display |
| Easy export capabilities | Centralized security |
| Optional CAR/LAR functionality | Upgradeable to Multi-User AQURIT® |

For More Information Call: 877-427-8748 or 877-527-8748

No More Squinting.

Unlike microfilm, AQURIT® Microfilm Replacement delivers high-quality, digital images of checks every time. Crisp, sharp images – archived in either bi-tonal or grayscale image format – eliminates the struggle to read microfilmed checks. Plus, AQURIT® Microfilm Replacement dramatically reduces your storage requirements: boasting a desktop footprint of less than two square feet, the software can store years of images and related

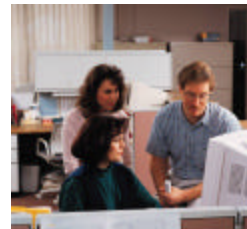

No More Delays.

AQURIT® Microfilm Replacement makes images available immediately upon capture – eliminating the delay of one day (or more) waiting for your microfilm to be developed. This means you can immediately handle walk-in requests for check copies, and phone-in requests from customers or other bank personnel. Retrieved images may be instantly printed, faxed or e-mailed with details of all relevant index field information.

No More Hunting For Checks.

AQURIT® Microfilm Replacement greatly reduces the time spent searching for checks. Users can search for items using numerous index fields, including scan date, account number, check number, ABA number, operator, and the auxiliary On-Us field. The software also supports complex searches for combinations of index fields. And, all images and data can be exported, and are easily backed up for security and disaster recovery

No More Time To Lose.

For more information on how AQURIT® Microfilm Replacement can streamline your operations, contact **Aquracy Corp.** today. Also ask about our software's demonstration mode before purchase!
